DETERMINATION OF NONSIGNIFICANCE (DNS)

Name of Proposal: WILEY SLOUGH PUMP STATION

Description of Proposal:

This project includes the construction of a pump house on Wiley Slough, housing dual pumps to maintain certain water levels in the slough to maintain groundwater at a level conducive to agriculture. A wet well will be excavated for the pumps in the bank of Wiley Slough. The pump house will be built on a pile-supported platform over this wet well. A walkway from the ground to the pump house will be built. The pumps will be set into a wet well composed of a concrete slab and ecology block walls. A trash rack will also be installed to keep debris from entering pumps. Pipes from the pumps will be installed through the dike to discharge into Skagit River's Freshwater Slough estuary. Tide gates will be placed on the outflow end of the pumps' pipes. A gravel pad will be constructed next to the pump wet well to allow maintenance of the pump area and wet well.
